

SANIPRO 20.12 A P

SANITIZING MACHINES

SaniPro 20.12 A P is the ideal machine for sanitizing indoor environments such as mechanical and artisan workshops, schools, offices, canteens, restaurants and cafés. The Gotec pump (20 bar operating pressure), supplied as standard, allows the operator to work continuously and to use a wide variety of chemicals thanks to its resistant seals. Quality equipment and professional performance are SaniPro's strengths. The dispensing lance, 50 cm long to reach the most difficult areas, is equipped with a conical nozzle (grey) in high resistance ceramic. Its flow rate, combined with the high capacity of the solution tank (12 l), is able to guarantee a running time of two hours. The other nozzles supplied as standard (green and orange) and the possibility of transforming the lance into a dispensing gun quickly and easily (just screwing the nozzle directly onto the handle) make SaniPro extremely versatile. The spiral extensible hose, which can reach a length of 7.5 m, and the 15 m electric cable allow to cover a large working area. Compact and easy to transport, thanks to the trolley equipped with a practical basket for objects and a special housing for the dispensing lance, it is the ideal machine to respond professionally to specific sanitizing needs.

Front swivel castor wheels

Quick connection

Cleaning solution tank with graduated scale

Practical trolley

Basket holder for accessories

Extendable spiral hose, spray lance, nozzles

Various types of nozzles

PRODUCT IDENTIFICATION

TYPE	REF. NO.	PIECES/PALLET
SANIPRO 20.12 A P	16801210001	4

TECHNICAL DATA

Voltage - Frequency	220-240 V~ 50/60 Hz	IP code	IPX4
Rated power (nominal power)	W 25	Power supply cable	m 15
Max. pressure	bar 20	Maximum length of the extendable spiral hose	m 7,5
Solution tank capacity	l 12	Weight (without accessories)	Kg 9,3
Sound level	db(A) 58	Dimensions	mm 760x390x900

STANDARD ACCESSORIES
